

PSYCHOLOGY

As a contemporary science and applied profession, **psychology** represents a rational and systematic attempt to understand human behavior by studying the processes of development, perception, learning, motivation and thinking, and the relationship of these processes both to the physiological and social functioning of humans. As a psychology student you will study a broad coverage of the discipline, have the opportunity to utilize technologies and tools for research, and prepare for a graduate education or diverse career path all under the supervision of field leaders.

Factors of success:

Engagement
with the CSU
Career Center

Internship or
research
involvement

On campus
employment

GPA
